

MAINTANANCE PRODUCTS

Coating and Maintenance Products – everything from one single source ...

... guarantees best protection and durability of your flooring substrate.

Each year, around 120 million square metres of pre-finished parquet and DPL floors are coated with Klumpp products: All over the world and in all manner of climate conditions. We are continuously feeding our extensive global experience into the development of our coating- and care products from which your parquet will benefit too! Klumpp coatings and care products are the state of the art and meet the most stringent environmental standards. On top of that, they are free of any contents that are hazardous to people.

Safe to use

- ✓ No carcinogens
- ✓ REACH approved substances
- ✓ **eco** approved coating systems
 - ✓ No Formaldehyde
 - ✓ No heavy metals
 - ✓ Free from insecticides, pesticides and herbicides
 - ✓ No plasticizers (Phthalates) EN 71-3

Our product range features high-quality UV coatings and oils and matching care products – all under one roof! Below is a brief summary of the care products needed to retain your parquet's high-quality finish for years to come:

Product Portfolio

Product	Article Number	Dosage
NATURAL OIL CARE	075-000-00010	Undiluted
HYDRO CARE	024-000-00753	1:50 (one part product to 50 parts of water)
HYDRO CLEANER	024-000-00755	1:10 (one part product to 10 parts of water)

CARE INSTRUCTIONS

For natural oiled floors

Impregnated floors offer sufficient protection against dirt and liquid ingress. Cleaning and care of your floor is thus easy to manage.

1. Dry-Cleaning

- The best way to remove loose, coarse dirt (e.g dust and sand particles) is to use a soft brush or vacuum cleaner. Regular cleaning is easiest this way.

2. Routine Cleaning

- After dry cleaning, clean your floor with vinegar solution and a slightly damp standard household mop (not the microfibre variety). Allow your floor to dry. Done.
- If the vinegar solution does not produce satisfactory results, we recommend you use our HYDRO CLEANER instead. The HYDRO CLEANER is diluted in warm wipe water (1:10) or applied with a soft cloth in concentrated form to smaller areas. HYDRO CLEANER is a wax-remover. We recommend you apply HYDRO CARE after use to help the formation of a fresh protective layer.

3. Care

- HYDRO CARE produces a protective film and provides long-term protection when used regularly.
- Apply HYDRO CARE with a standard household mop after thoroughly cleaning it with HYDRO CLEANER. HYDRO CARE is diluted 1:50 with water and applied to the floor with a slightly damp cloth. Allow to dry. Done.

4. Touch up

Applying a course of NATURAL OIL CARE freshens up your natural oil floor giving it a new impregnation with silky sheen finish. NATURAL OIL CARE is applied sparingly to the floor and thinly and evenly massaged into the floor using a soft cloth or pad. Avoid applying too much of the product at once.

IMPORTANT NOTE

Oil-soaked cloths / pads must be left to soak in water! Risk of spontaneous combustion!

Whenever applying cleaning- and care products to your floor always ensure no standing water is left behind. This can damage your parquet (swelling).

Only dry clean surfaces recently treated with NATURAL OIL CARE in the first few days after treatment.

Don't use any type of microfibre mop as it may scratch your flooring.

1. Dry cleaning with vacuum cleaner or soft brush

2. Routine cleaning with HYDRO CLEANER or vinegar-water

3. Care with HYDRO CARE

4. Touch up with NATURAL OIL CARE
