QC methods to check UV coated (pre-finished) floors

We add value to your surface

In order to give our customers the best support possible for their QC, our QUALITY INITIATIVE is focussing on the **three essential test criteria** for the running production:

- ✓ Adhesion
- ✓ Gloss value
- ✓ Colour tone

Just go ahead and download our documents "QC-Methods" or "Short description QC-Methods" in the Services section of our web page.

For further information about the establishment of an efficient day-to-day Quality Control, please just ask your responsible technical account manager. He will be glad to support you!
