MAINTENANCE PRODUCTS

Coating and maintenance products – everything from one single source...

...guarantees best protection and durability of your flooring.

Each year, more than 1.2 million square meters of pre-finished wood and DPL floors are coated with Klumpp products. We take feedback from that global experience and use it in further development of our industry leading coating and care products.

Klumpp coatings and care products meet the most stringent environmental and personal health standards!

Environmentally friendly

- Sweat and Salvia Resistance (DIN 53160-1/2)
- No Carcinogens
- REACH* Approved Raw Materials
- eco INSTITUT Approved Coatings Systems
- No VOC Emissions (Volatile Organic Compounds)
- No Formaldehyde
- No Heavy Metals
- No Insecticides, Pesticides and Herbicides
- Phthalate free (EN 71-3)

*REACH (Registration, Evaluation, Authorization and restriction of Chemical substances)

Product portfolio

Product	Article Number	Reduction
HYDRO CLEANER	024-000-00755	1:10 (one part product to 10 parts of water)
HYDRO CARE	024-000-00753	1:50 (one part product to 50 parts of water)

HYDRO CLEANER
Art. 024-000-00755

HYDRO CARE
Art. 024-000-00753

CARE INSTRUCTIONS

For prefinished, hand applied and UV-oiled wood flooring

Finished floors offer good protection against exposure to dirt and liquids. Cleaning and maintenance of your floor is easy.

- 1. Dry cleaning**
 - The best way to remove loose, coarse dirt (e.g. dust and sand particles) is the regular use of a soft brush or vacuum cleaner.
- 2. Routine cleaning**
 - After dry cleaning, clean your floor with a vinegar solution (1:20) and a slightly damp cloth. Allow to dry and you are done.
 - If the vinegar solution does not produce satisfactory results, we recommend to use our HYDRO CLEANER instead. The HYDRO CLEANER is diluted with warm water (1:10) or applied with a soft cloth in concentrated form to smaller areas. HYDRO CLEANER is a wax-remover. We recommend application of HYDRO CARE after use to create a new protection layer.
- 3. Care**
 - HYDRO CARE creates a protective film and provides long-term protection if used regularly.
 - Apply HYDRO CARE with a standard household mop after thoroughly cleaning with HYDRO CLEANER. HYDRO CARE is diluted 1:50 with water and applied to the floor with a slightly damp cloth. Allow to dry and you are done.

IMPORTANT NOTE When applying cleaning and care products to your floor please take care to avoid standing water. This will damage your wood flooring (swelling)).

Do not use any microfibre mops, it may scratch your wood floors.

1. Dry cleaning with vacuum cleaner or soft brush

2. Routine cleaning with HYDRO CLEANER or vinegar-water

3. Care with HYDRO CARE
