

### EASY PROCESSING

- + Application via efi-digital printer
- + Color justification by color management
- + No more (analog) stain tinning
- + Color effects will be generating because of application an inorganic special ink.
- + No storage of stains needed
- + Possibility of fast color change (online)
- + Highest color stability (digital)

### TECHNICAL PROPERTIES

- + Inks with inorganic pigments for printing with efi-digital printers
- + Applicable on different real-wood substrates
- + Klumpp Coatings primer and also UV-performance coating layer are the ideal solution for a brilliant color effect and a long hold protection

### ADDED VALUE

- + Extremely natural color impression
- + Realization of color effects which were unthinkable till now

## DIGITAL STAINING

Digital staining on wood with digital printer
