

ANTISEPT

Highest protection against bacteria and mold for clinically clean surfaces!

EASY PROCESSING

- + Suitable for many floor substrates (cork, hard wood, PVC, SPC and printed floors)
- + Can be applied with common machine configurations
- + No negative influence on the processability of the coating material

TECHNICAL PROPERTIES

- + Approved according to standards ISO 22196, ASTM G21-15, ASTM E2180-07
- + High reduction value of >99,9%
- + Unlimited effectiveness as long as the surface is not damaged
- + Permanent antimicrobial effect against bacteria and fungi, also active against multi-resistant germs
- + No negative impact on mechanical or chemical resistance or transparency
- + Range of suitable gloss levels from 5 up to 70 units @ 60° measuring angle

ADDED VALUE

- + Long-lasting protection against bacteria and mold, ideally suited for surfaces in public, medical and private areas
- + Not sensitizing or irritating to the skin
- + No volatile organic compounds
- + Post-treatment not required
- + Long-lasting surface sealing
- + Easy-to-clean
