

EASY PROCESSING

- + Application via efi-digital printer
- + Color justification by color management
- + No more (analog) stain tinning
- + Color effects will be generating because of application an inorganic special ink.
- + No storage of stains needed
- + Possibility of fast color change (online)
- + Highest color stability (digital)

TECHNICAL PROPERTIES

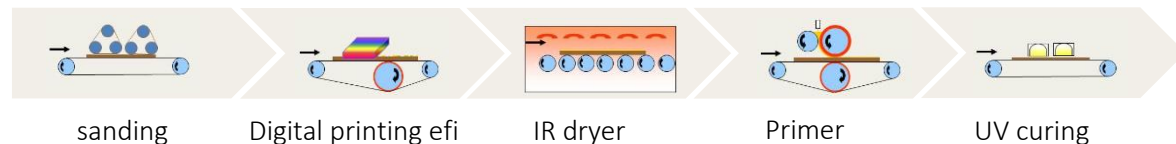

- + Inks with inorganic pigments for printing with efi-digital printers
- + Applicable on different real-wood substrates
- + Klumpp Coatings primer and also UV-performance coating layer are the ideal solution for a brilliant color effect and a long hold protection

ADDED VALUE

- + Extremely natural color impression
- + Realization of color effects which were unthinkable till now

DIGITAL STAINING

Digital staining on wood with digital printer

...followed by further processing of the desired UV coating system (performance coatings and top coat)
